

riskmethods - how the world's top manufacturing companies visualize, understand and monitor their global supply networks!

We are a SaaS startup with an innovative data-driven service that enables companies to proactively mitigate risks in their supply chains to protect revenues and reputation. We are backed by reputable Venture Capital firms and our award winning experience in procurement and supply chain, together with a great product at the right time, has placed us on an excellent growth trajectory.

We are a SaaS startup with an innovative data-driven service to help reduce supply chain disruptions due to natural disasters, sanctions and many other causes. We create visibility for the eco-friendliness and sustainable production policies of companies world-wide. Founded in 2013, we already received several awards and prizes. We are a team with great investors, solid finances and a great product at the right time, allowing us to be on an excellent growth trajectory.

We are working with a Ruby/PostgreSQL/Backbone stack, with a lot of Sidekiq data crunching under the hood, serving our web, iOS and Android applications.

We are growing rapidly! Are you an experienced Full-Stack Developer, someone who enjoys working in a start-up? Then jump on board!

For our Munich office we are looking for an experienced

Full-Stack Developer (m/f)

Your Job:

- You will play an important role in our Ruby/JS development team, bringing your experience to the table when it comes to defining the best user experience for our users for new modules, or when improving existing functionality.
- From day one, you will be working on stories that are directly visible to our customers, and will help make our product even better than it is today. Quality is one of our key goals, and you will be a part of that when it comes to code style and quality, automated testing and visual consistency.
- You will be able to contribute your own ideas to a unique product that is much more than the next shoe-shop/photo-sharing app.
- You will be working in one room with the product owner, UX designer and a great team. We're a Scrum shop.

Requirements:

- You have significant experience in Ruby on Rails, ideally with a SaaS product in a B2B environment.
- You have significant experience working with JavaScript & BackboneJS.
- You have a positive, can-do mentality.
- You are fluent in English, German is a plus.

Bonus points:

- You have experience scaling Ruby applications.
- You have experience in SQL, in particular PostgreSQL.
- You have experience working in an agile environment.

If you're not sure whether you have the right qualifications, we can only encourage you to talk to us.

Interested? We offer:

- A stimulating, fast-paced and fun environment with flat hierarchies and steep learning curves.
- The opportunity to grow and expand your skills in a dynamic environment, to gain new knowledge and to accept challenges.
- A lot of responsibilities and leeway, as well as the opportunity to work in an exceptionally professional team.
- Choose the working equipment you prefer.
- A wide range of options regarding working times and work locations.
- Our office is in the center of the beautiful "in" part of Munich, Haidhausen, which is easy to reach by car and public transport.
- Attractive compensation models. We design every compensation package individually based on your skills and preferences

We are looking forward to your application including a cover letter and CV:
